Why Red Meranti ?

Meranti Wood is a flexible wood with a variety of subspecies, and sources. Meranti is one of the easiest hard woods to deal, such as it easily cuts, machines processes just as sands. Meranti Wood is one of the reasonable hard woods so it is utilized for molding, furniture, structure, window, cupboards, and door trim.

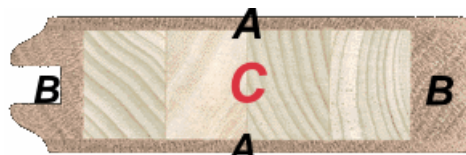

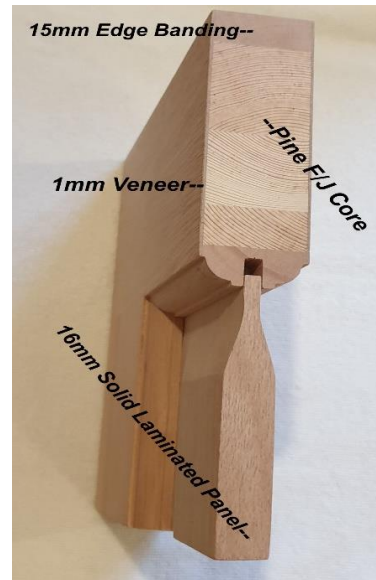

Door Cross Sections

- A: Hardwood Veneer Face: Red Meranti
- B: Hardwood Lipping(Edge Banding): Red Meranti
- C: Finger-Jointed/Pinewood Core

Our solid wood doors have a veneer thickness of 1mm thick or more applied to a wood core with matching wood edges and solid wood panel.

Remarks:

1. Red Meranti Grade: Select & Better Grade(Clear)
2. Price: FOB
3. Packing: Export Standard Each CTN Box Packing
4. Wood Grain: VG(Stile & Rail: Veneer) / FG+VG=Mix Grain(Solid Panel)
5. Solid Panel Door Wood Color: Natural Mix Color(Unfinished Door)

6. Moisture content(KD): 12-15%
7. Surface Sanding Finished: Sanding Paper 320Grit Finished
8. Glue: Made in Japan F☆☆☆☆ Use certified adhesive
9. Glue Technology: We use **AICA** Glue Co., Ltd.

To find out about the glue we use, click the attached [PDF](#) file.

GLUE PRODUCT DESCRIPTION:

AICA is a water-based adhesive specifically designed for use where excellent water and heat resistance are required. **AICA** has excellent adhesion to various wood species and is designed for use in RF Machines as well as hot and cold-press applications.

When properly catalyzed and cured, **AICA** will meet the requirements of a Type 1 adhesive.

It also possesses excellent storage stability, fast cure cycles, and easy clean up.
